RLAGELBVIEH@AOL.COM
WWW.CRANVIEWGELBVIEH.COM

Greetings,

Welcome to our 18th “Genetic Progress” production sale. It’s always a great pleasure to invite both new and repeat customers to this event.

It’s been another difficult year in our communities, our country and our world; and, I am hopeful for better days ahead. With the worst drought in over 100 years, 2021 pushed our management practices to the limits. But, even with the drought, I believe the top end of these bulls are as stout as any set of calves ever raised here.

Our goals continue to revolve around customer profitability...even in tough years. In our eyes, this means you need:

- I. A great maternal factory...smaller cows weaning bigger calves. We continue to put downward pressure on mature cow size as resources in these drought years can be limited.
- II. A live calf
- III. Calves excel at growth
- IV. Cows must be efficient
- V. Carcasses need to be industry acceptable (guarantees buyer competition for your calves)

Using these goals to drive genetic improvement decisions is our belief in keeping all customers on a progressive path forward. We continue to use embryo transplant (ET), artificial insemination, and natural service sires to accomplish these goals.

For those of you using EPDs to drive your decisions, which we strongly recommend, we continue to invest in DNA testing for every animal in our sale. This is a way to validate and improve accuracy of the existing EPDs for every animal and to confirm animal's parentages. Without doing this, all ET flush mates would have the same EPDs.

We do everything we can to make our cattle work for you. We pay strict attention to all the convenience traits that make the cattle business easier, including disposition, structural soundness, feet and udder quality. We are extremely proud of the fact that our cattle have gone into different environments across the U.S. and performed very effectively.

As always, in the event something does happen, we guarantee our animals through the first breeding season.

Again, thank you for your confidence and your continued support of our program. Please feel free to reach out with any questions.

Sincerely,

*Rob, Bill and Noah
Arnold*

CRANVIEW GELBVIEH

Genetic Progress SALE

88 LOTS SELL!

44 Purebred Gelbvieh, Balancer® and Angus Bulls
44 Purebred Gelbvieh and Balancer® Open Heifers

SATURDAY • MARCH 26, 2022 • 1:00 PM CDT
RUGBY LIVESTOCK • 2818 Hwy 2 WEST • RUGBY, ND 58368

SALE DAY PHONES:

Rugby Livestock • PH: 701.776.6393
Rob Arnold • PH: 701.720.8823
Chris Mitchell • PH: 334.695.1371

AUCTIONEER:

Chism Peterson • Chamberlain, SD
PH: 605.730.4212

ADDITIONAL SALE INFORMATION:

ACCOMODATIONS: Northern Lights Inn • Rugby, ND • 701-776-5776
Cobblestone Inn and Suites • Rugby, ND • 701-881-3000

FOOD AND REFRESHMENTS: A complimentary meal will be available sale day at sale facility.

LIABILITY: All persons attending the sale do so at their own risk. Cranview Gelbvieh, sale management, Rugby Livestock and/or the auctioneer assume no liability for accidents, theft or damages on the sale site.

SUPPLEMENT SHEET: A supplement sheet will be available sale day with any additions or corrections to the catalog. Any information on the supplement sheet or announced from the block will take precedence over the catalog. All EPDs current as of February 28, 2022.

TERMS AND CONDITIONS: All cattle will be sold at auction under the standard terms and conditions recommended by the American Gelbvieh Association. Terms of the sale will be cash or check at the conclusion of the sale unless prior arrangements are made. WE RETAIN 50% SEMEN INTEREST IN ALL BULLS SOLD IN THIS SALE.

ANNOUNCEMENTS: Announcements from the auction block regarding the cattle selling will take precedence over information listed in this catalog.

BUYERS UNABLE TO ATTEND THIS SALE: Mailed or telephoned bids will be handled in the most confidential manner. You may contact any of the owners, auctioneer or livestock publication representatives.

GENETIC PROGRESS BULLS AND FEMALES

**CRANVIEW GELBVIEH IS RETAINING 50% SEMEN INTEREST IN ALL BULLS SELLING.
BUYER GETS FULL POSSESSION AND 50% SEMEN INTEREST WITH YOUR PURCHASE.**

ONLINE VIDEOS: View online videos of all animals selling at www.cranviewgelbvieh.com or www.mms.bz.

HEALTH: All bulls and females sell as guaranteed breeders. Bulls have not been semen tested. Please have bulls semen tested prior to turning out for this breeding season, if you take home. Scrotal measurements and yearling weights will be supplied on the supplement sheet sale day. All animals selling will sell with a valid health certificate for shipment in the continental United States. Any special testing needed to get into certain states will be done by Cranview Gelbvieh prior to shipment.

TRUCKING: Cranview Gelbvieh is offering free nationwide trucking on all purchases of \$15,000 or more per ranch. For complete details please contact Rob Arnold of Cranview Gelbvieh or Mitchell Marketing Services.

GENOMIC ENHANCED EPDs

THE MAJOR BENEFITS OF GE EPDS ARE: risk reduction through improved accuracies, value of time to assess breeding stock at a younger age, increased rate of genetic progress, and getting data on economically important traits which are expensive or difficult to measure. Many of the bulls and females selling have GE EPDs and it is denoted just below the EPD box in the sale book.

SALE BOOK EPD EXPLANATIONS

CALVING EASE DIRECT (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

BIRTH WEIGHT (BW): Predicts the difference, in pounds, for birth weight of the calf.

WEANING WEIGHT (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YEARLING WEIGHT (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

MILK (MILK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

TOTAL MATERNAL (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. As an index, this value is not reported with an accompanying accuracy. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + 1/2 WW EPD.

CALVING EASE MATERNAL (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

YIELD GRADE (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

CARCASS WEIGHT (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

RIBEYE AREA (CREA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

MARBLING (MARB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

FEEDER PROFIT INDEX (FPI): An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

ARE YOU UNABLE TO MAKE IT TO RUGBY ON SALE DAY? BIDDING IS AVAILABLE ONLINE!

To view or bid at the Cranview Gelbvieh Production Sale:

- Log on to www.dvauction.com
 - Register to create a user name and password
 - Fill out banking information
 - Click Apply for Bidding and select Cranview Gelbvieh
You must have high speed internet access to bid.
- Questions? Please call PH: 308.870.3661.

BIRTH WEIGHT IN EMBRYO TRANSPLANT (ET) BULLS SELLING

The bulls selling as a result of ET all have Genomic EPDs listed in the sale book to increase the accuracy. ET calves do not have ratios for birth and performance weights as they are raised by a recipient cow that will not give you the true accuracy for birth and performance as will the genetics. The birth weight in ET calves is completely irrelevant and has no indication as to the expected birth weights of their calves. Please use the EPDs for calving ease and birth weight to help with the selection of the bulls in the sale offering.

POWER BUILT SONS • LOTS 2-4

Similar but a little bit different describes these three ET brothers. They all have extremely balanced EPD packages. Sired by the extremely popular Power Built bull and our extremely attractive Zula daughter. 557C is appearing to pick up where her mom left off. Z133 (557C's dam) produced many sale-topping bulls and females for us and these bulls will be just as popular. If you are looking for a red bull, these are really good. Check out the top 1% CREA on J5.

RIGHT COMBINATION SONS • LOTS 6-8

These three calves are sired by one of the soundest bulls in the Gelbvieh breed. Right Combination is one of the only bulls I know that was National Champion in both the USA and Canada. He will breed true performance-type cattle which are represented in these three calves. The dam of these calves was purchased in the National Sale from Plateau Gelbvieh in Colorado for her phenotype and carcass contributions; she is proving to be everything we expected. Excellent maternal and growth with very good carcass packages on all three bulls.

SONS OF EGL ROUNDHOUSE B019

LOTS 12-16

If you are looking for calving ease, look no further. These bulls are homo polled, homo black, and homo good on calving ease. You will notice that these bulls excel at carcass traits as well. This is the first flush for 71B as she has proven her way into the donor pen. You can expect to see more calves from her.

SONS OF BSF PRINCESS EL CAP W2 • LOTS 39-42

These 4 calves show you why we chose W2 as our foundation female to get started in the Angus breed...consistently good! When we saw Princess W2, I knew she was the one. She had the bone, the foot and the look of a sound female. She has produced some extremely popular Angus bulls. BSF Opportunist was named the Reserve Champion Angus bull at the NWSS two years in a row and BSF Hot Lotto is an extremely popular Barstow Cash son that Bull Barn Genetics continues to sell semen on...even though he was not shown, he was extremely popular while exhibited at the NWSS. Insight, Believe and Flat Top have all sired exceptional cattle. In fact, Noah sold our high-selling Angus bull two years ago to Aaseth's that was sired by Flat Top.

Where do I start? For those of us in the seed stock business, its all about a good factory to turn out an exceptional product. The Jackpot females are about as good a factory as you will find.

We paired Jackpot with one of the heaviest muscled, deepest soft-sided cows (D642 Resource daughter) that we own; we acquired her through flush rights of Volek's Legacy cow (Buddy Boy daughter). So, its taken a few steps to get to these game changing females. But, if you are looking for some really good cows to get started with, I think you need to consider these two females. Look at the maternal, look at the performance, and look at the carcass traits you can use to build with! Last but not least, they have that cow look.

OUR GOAL...use complimentary genetics that improve what we already have! Sometimes that is much easier said than done...in this case, it appears as though we touched every base to include home plate! The JI13 heifer is in the top 2% of the breed for performance and top 15% or better for maternal AND ranks in the top 15% or better on 4 of the 5 carcass traits. Home Run! The JI16 heifer is in the top 25% for growth, top 45% for maternal, top 5% for PG30 and Docility, and arguably a better carcass profile than her sister! Home Run! In the baseball world they would call this "Back to Back". All backed up by DNA to help sort through these girls. I think D642 is just getting started with her Legacy.

Zula 557C is the show heifer we selected to promote the Z133 Zula cow who has left many daughters in our herd and has had many sons & daughters topping this sale. Pro-bity (Futurity Winner) seemed like a logical choice given his complimentary EPDs and the complete phenotype package. Obviously you can see the differences of these 3 on paper since we DNA all our cattle, but when looking at these heifers in the pen, it is extremely difficult to say one is better than the other. 557C heifers were sale favorites in 2020 & 2021 going to Kansas, Missouri, Utah and NC and I am guessing they will be again.

This mating has been talked about many times since we first offered it in 2019. And just like then, these heifers will have many friends on sale day. This package represents a sire and a grand dam with many progeny working across the U.S. in many seedstock operations; and, a dam that is walking in her mothers footsteps. I believe, at the end of the day, Zula 557C will be as popular as her mother (DCH Zula Z133) and will write her own chapter in Gelbvieh history. Many times its hard to imagine or predict what the future holds for these young heifers...based on performance of their older sisters, the future looks extremely bright for these two. J108 has been a pen favorite since weaning. If you like red cows, this is your pen!

This mating resulted in this heifer ranking in the top 2% of the \$cow index. That means when we consider all the traits associated with getting bred, putting a calf on the ground, raising that calf to an acceptable weaning weight, and putting money in the bank, this heifer puts it all together. Build a herd around these type of cows. Bonus...she is in the top 10% on 2 carcass traits.

Rewind one year ago, the sister of these two heifers sold for \$9500 to Jason and Sadie Morris for 1/2 interest. Unfortunately for Sadie and the heifer, she slipped her calf mid-summer so she did not compete on the big stage but was very successful on the small stage up to that point. The biggest stage for any cow is the Legacy they leave...we have extremely high hopes we will see a lot more from this heifer. These two sisters offer the same genetic package...emphasizing growth and maternal. In my opinion, the JI20 heifer offers a little better carcass package while the JI19 heifer offers an edge in the show ring. Build a herd around these type of cows. Bonus...she is in the top 10% on 2 carcass traits.

If you are looking for breed average on growth and carcass improving genetics, here is a great place to start. Top 10% for marbling, top 50% for CFAT & CW. YG & CREA could easily be improved with a single mating as those traits are easier to find within our genetic base.

Complete Cow Alert and maybe potential donor! A favorite of mine and the natural calf out of our donor Z256 ET...this is the cow everyone asks about when touring the cows. This heifer offers Top 20% or better on all growth and maternal traits AND Top 5% on 4 of the 5 carcass traits. Homo Black and Homo Polled too. She definitely has the credentials to be a donor but she still has to prove herself.

Natural calf out of our 14 year old donor cow and will calve again on time in 2022. If you want to buy proven genetics that stand the test of time and still producing....start here! If that doesn't mean anything, look where this heifer stands with her EPD's...top 1% for CFAT, top 20% for ADG, top 5% for YG, top 45% for Marbling, top 10% for WW, YW, & Milk, top 4% for TM, top 3% for Doc & Stayability, top 10% \$Cow index, top 10% EPI, and top 40% FPI. Holy Cow...how much better can it get?

DONOR ALERT! Complete Cow Alert! There is not enough flashing lights to highlight this heifer. Keeping possession of CRAN F11 "Pot Committed" might be one of the better decisions I've made. This heifer group sold well in 2021 and I anticipate will do so again in 2022. Very seldom do we miss on an improved genetic mating with this sire and what's even more impressive, we see phenotypic outcomes like this. Be sure to check out the other daughters in the sale and you will see what I mean. In looking at the 12 growth and maternal traits that the AGA evaluates, this heifer ranks in the top 50% or better on 10 of those. If that's not enough, she ranks in the top 50% or better on 7 of the 8 carcass and intake traits the AGA measures. Given all that...she indexes in the top 25% for \$Cow, top 50% for Feedlot Profit Index, and top 35% for Efficiency Profit Index. If I can borrow a phrase from the famous Keith Jackson (college football announcer), he would be hollering at the top of his lungs "Whoa Nellie"! Reserving the right to flush Lot 85 for a minimum of 6 embryos at seller's expense.

Princess A313 is the daughter of W2 (Angus Cow)...check out the footnotes on the Angus bulls. We showed A313 at the NVVSS and sold embryos in CA and U.S. on this cow. Check out the growth and maternal numbers on this heifer...almost off the charts! Keep in mind, as a breeder, its a lot easier to start high and work your way down than it is to start small and work your way up...if this growth is too much, there are a plethora of bulls that will moderate in one mating; but it will take you 10 years of matings to reach the growth numbers this heifer offers. Don't forget to check out the carcass package she brings.
